Jakarta, Indonesia

I am a motivated and skilled backend engineer specializing in Golang and full stack engineer using MERN stack. A graduate of the University of Jember's Faculty of Computer Science, I have a strong foundation in programming and a passion for creating efficient and scalable solutions. With a keen attention to detail and a problem-solving mindset, I thrive in a collaborative environment and enjoy tackling complex challenges in the field of software development.

Work Experiences

PT. Blue Bird Tbk - Jakarta Selatan

Mar 2023 - Jun 2023

Golang Engineer

- As a backend engineer specializing in Golang, I have extensive experience developing APIs for backend services. In my recent internship project, I successfully created a range of APIs that served as the backbone for a developed system. With a strong command of Golang and a focus on delivering reliable and efficient solutions, I am equipped to contribute to future projects and drive innovation in backend development.

Mojave Home Collections - Freelance

Jul 2024 - Aug 2024

Frontend Developer

- I was responsible for designing and building the company's website using React. I collaborated with the design team to create an elegant and professional visual appearance, and ensured that the website displayed the company's information in an attractive manner. In addition, I developed various animations to provide dynamic elements that enhance interactivity and user experience. I also optimized the website's performance, ensured cross-browser and device compatibility, and maintained smooth site usage.

Education Level

University of Jember - Jember, Jawa Timur

Aug 2020 - Jul 2024

Bachelor Degree in Information Technology, 3.78/4.00

- During my education at the University of Jember, I studied various aspects of information technology, ranging from web and mobile application programming and development, to UI/UX design. I also delved into topics related to machine learning and artificial intelligence, as well as efficient and scalable software development. This education gave me a strong foundation in programming, as well as the practical skills to build innovative digital solutions.

Ruangguru CAMP x Kampus Merdeka Batch 3 - Online

Aug 2022 - Dec 2022

Certificate in Backend Engineer, 4.00/4.00

- During this bootcamp, I learned the fundamentals of the Golang programming language, as well as delved into various backend engineering concepts. My main focus included creating REST APIs, database management, and developing efficient backend systems. This experience strengthened my understanding of server management and application architecture, as well as how to build scalable and performative backend solutions.
- In this role, I was also trusted to be the mentor's assistant. I assisted the mentor in explaining the learning material to the other participants, strengthening their understanding of backend concepts such as REST APIs and database management. This experience enhanced my skills in technical communication and providing guidance to peers.

GoTo Impact Foundation - Online

Jul 2023 - Dec 2023

Certificate in Fullstack Engineer Generasi Gigih 3.0

- During this bootcamp, I learned system development using the MERN stack (MongoDB, Express, React, Node.js). I gained a deep understanding of how to build backend and frontend simultaneously, as well as manage databases to create efficient and responsive systems, especially for website development. This bootcamp strengthened my skills in fullstack application development from design to implementation.

Skills, Achievements & Other Experience

- Gacoan Delivery Mobile App**  (2022): Played a vital role as the Software Engineer and UI/UX Designer Lead in developing the Gacoan Food Ordering App, an Android application aimed at facilitating food ordering from nearby restaurants.
- Squad Management System** (2023): Developed a range of APIs as a Backend Engineer, specializing in Golang, for a significant internship project at Bluebird Group Tbk.
- Tokopedia Play Copy**  (2023): This project allowed me to develop my skills in backend and frontend development. I learned how to use Node.js, Express.js, MongoDB, React.js, and CSS to create a fully functional website.
- Hard Skills:** Go, Javascript, Dart, Python, HTML, CSS, MERN Stack, Flutter, Rest API, Git, SQL, NoSQL
- Soft Skills:** Problem Solving, Communication, Teamwork & Collaboration, Adaptability, Time Management, Mentoring
